## MODEL 860/02 Portable Intercept

### STANDARD EQUIPMENT:

- 22" diameter receiver body for low can velocity.
- Counterweighted dump valve assembly, 6" size. Automatically discharges material when vacuum source is shut down.
- Discharge outlet adaptor for bagging of debris with 16" under-clearance to remove bag.
- Heavy-duty pan deck to support filled bags.
- Heavy-duty square tubular steel frame with two (2) 8" diameter x 2" wide front wheels and two (2) 4" diameter rear swivel casters, one includes a total lock. Includes full-width round handlebar.
- Carbon steel construction with blue powder coat finish
- Dimensions: 42"L X 26"W X 71" H  
Weight: 150 lbs.

Shown above with a twin jet venturi vacuum.

When using the MDL860/02 Intercept with a twin jet unit use the .75" NPT Compressed air connection to power intrinsically safe air powered vacuum. A .75"NPT X .5"NPT Reducer is included for use with a single venturi unit.

Individual Anti-static poly bag loading. A box of 50 bags is included.
